	L.	On 7 April, one twin-engine plane, eight single-engine aircraft, and 33 fighters were parked at the field.	25 X 1
	5 .	On 7 April 1951, a train load of ten crates with MiG-15s, consigned to Unit arrived at Laerz (N 54/U 33) airfield. The shipment came from Finow (N 53/V 08).	25 X 1
	6.	The Rus-2 radar set in Rechlin (N 5h/U 33) was replaced by a Dumbo radar set. A set of Dumbo type was previously observed there.	25 X 1
		Comments	25X1
1	(1)	The arrival of 12 crates was previously reported	25X1
		The dates reported are probably the dates of pack-ing or dispatch.	25X1
((2)	Noteworthy is the fact that only one bulge was seen on each wing. The same observation was made on jet planes parked at the Neuruppin airfield.	
		boservacton was made on jet planes parked at one medruppin allileid.	25 X 1
((3)	Previous information indicated that the MiG-15 retracts its nose wheel rearward. the same observation from the Neuruppin airfield. From the information that only one bulge exists on each wing and from previous information that four weapons	25X1
		are fitted in the nose it is believed possible that the fighter regiments stationed in Laerz and Neuruppin are equipped with aircraft type other than the MiG-15 previously seen there.	
•	(4)	It is believed that a total of about 60 jet aircraft are stationed in Laerz. The planes belong to the two fighter regiments and a fighter division headquarters.	
•	(5)		25X1
		at least 51 jet planes are stationed there.	
	(6)	This indicates that 22 jet aircraft arrived in Laerz between 26 March and 7 April 1951. It is believed that the aircraft are not replacements but	
		are intended to increase the number of planes assigned to the fighter regiments stationed in Laerz. Most of the aircraft shipments recently arrived from the U.S.S.R. were destined for Finow. From the information that the aircraft for Laerz came from Finow it has been concluded that jet aircraft arriving from the U.S.S.R. first go to Finow from where they are distributed	
i	(7)	to other airfields.	25X1
	(1)	The radar set belongs to the fighter division headquarters in Rechlin, the higher headquarters of the fighter regiments stationed in Laerz and Parchim.
